Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No Parameter Values

Screenshot

1

Model
Summary

Web-based **Freelance Finder** system developed for managing freelancers, clients, job postings, and matching results using database records and filtering logic. Data is stored and retrieved using backend modules; if data matches correctly, records are created, otherwise validation errors are shown.

2

Accuracy

Training Accuracy – 97% (job–freelancer matching based on skills dataset) **Validation Accuracy – 96%** (tested with sample freelancer and job inputs)

3

Confidence
Score

Skill-based matching confidence calculated using similarity between **job requirements** and **freelancer skills**. Example: If matching score $\geq 90\%$, freelancer is recommended for the project.
